

**** Apply by April 29, 2023 ****

2023-2024 NASA

Undergraduate Research Internships

Missouri Space Grant Consortium

Applications are being solicited for Summer 2023 and/or Academic Year 2023-2024 NASA internships to work with Missouri State University faculty. These are paid internships (\$15/hr up to 300 hours for the summer and/or academic year) and projects include: exoplanets, stellar seismology and populations, quantum materials, superconductivity, battery performance, AI, and more.

Applicants must be U.S. Citizens, have a minimum GPA of 3.0, and must show a demonstrated interest (as evidenced, for example, by having a major in the sciences and/or by having completed one or more advanced courses in astronomy) in pursuing a career in a NASA-related field (such as astronomy, space science, aerospace engineering, etc.).

Applications available on-line at <http://sdbv.missouristate.edu/mreed/NASA>. Project descriptions and further information are also available on this web page. **Submit application materials to Dr. Mike Reed (email below)**

For further information, contact Dr. Mike Reed, PAMS Department, Kemper Hall (email inquiries to mikereed@missouristate.edu)
